

  
**EMBASSAIR**

The FBO, reinvented.

MIAMI - OPA LOCKA

“Embassair’s first FBO was designed to be the quintessence of savoir-faire in high technology, luxury and aviation. Surrounded by experienced partners, we have created the FBO of the future.

It is a model of security and privacy at its core and aims to be a reflection of beauty, elegance, art and culture with excellence in every detail.”

A handwritten signature in white ink that reads "Frank Devaux". The script is fluid and cursive, with a large initial 'F' and 'D'.

***TAILOR-  
MADE  
LUXURY***

We are pleased to introduce our first-ever FBO at Miami-Opa Locka Airport (OPF) in South Florida. This next-generation FBO is a monumental feat designed by internationally renowned architect Jacques Rougerie. He envisioned it as a technological marvel reaching the highest standards of security and privacy. This unique project offers passengers and private jet crews an unprecedented level of service.

Seen from the sky, this futuristic FBO spreads its two immense “V”-shaped wings “like a bird in flight,” explains Jacques Rougerie.

A visionary architectural project with a modern and elegant design, Embassair’s first FBO offers top-of-the-line facilities.

## THE LOBBY

Our luxury hotel-inspired lobby is bathed in light and imbued with contemporary style.

It opens onto two areas dedicated to the well-being of both passengers and crew. It is also a new satellite of the cultural life of Miami's vibrant metropolis and is available for private parties and events.

A SECURE AND COMPLETELY PRIVATE JOURNEY

Our FBO is the first of its kind to provide a 3-meter-high tarmac shield, an architecture that guarantees the highest level of security and privacy for its passengers with a one-of-a-kind completely covered private parking area. In addition, a 60,000 square feet area is reserved for aircraft hangars.

## VIP LOUNGES

Our South wing opens its doors to VIP lounges with a 5-star service. We welcome and assist business and leisure travelers arriving at their destinations or in transit to another location. Travelers from all around the world are invited to enjoy the refined spaces complete with the finest amenities in complete comfort.

These spaces have been developed in collaboration with the design teams of Extime, the hospitality brand of the "Aéroports de Paris" Group, who have transformed the FBO experience. Excellence in service, design, and commercial offerings come together to dazzle FBO travelers, turning wait time into valuable time.

It's time to take the time!

## THE ULTIMATE IN WELL-BEING

Embassair opens its exclusive North wing to pilots and crew members who can enjoy the same prestige service as other travelers. A pilot's lounge awaits them with an ambiance inspired by the golden age of aviation.

As pilots ourselves, we understand the specific needs of crews. That's why we make it a priority to provide first-class services to make your visit as memorable and efficient as possible with spacious and modern snooze rooms (ranging from 185 to 270 square feet), all equipped with bathrooms, a gym, a buffet lounge, a business and co-working area, and more.

## A DEDICATION TO AVIATION AND SERVICE AT THE EPITOME OF EXCELLENCE

Embassair's founders have always been inspired by the magic and genius of aviation. From the legendary Dakota C-47 to the most modern aircraft, for us, flying is above all a privilege and an *art de vivre*.

We believe that our terminal is more than just a place to pass through. It is the extension of a desire and a vision to combine boldness with excellence. This passion has led us to invent a new art of travel rooted in safety, comfort, pleasure and tranquility.

Choosing Embassair means rediscovering the charm and supreme quality of traveling.

Choosing Embassair means letting go and traveling freely.

## FRENCH SAVOIR-FAIRE AT ITS FINEST

Based on an original idea by Franklin Devaux, a specialist in security systems and founder of an airline company acquired by Air France, and Frank Devaux, a professional pilot and founder of Flying Legend, Embassair brings together aviation enthusiasts and professionals. Throughout our aviation adventure, we have teamed up with talented and well-known entrepreneurs such as Michel Reybier, owner of extraordinary hotels including “La Réserve”, and several renowned wine and champagne estates, Jean-Michel Aulas, President of the investment fund Holnest and former owner of the soccer clubs OL Reign (Seattle) and Olympique Lyonnais (Lyon, France), and “Aéroports de Paris” Group, the world’s leading airport group. All of these esteemed team members are the ultimate partners to create this unique embassy of excellence.
